## 2020-2021 Health Workforce Program Highlights

# 8,151

Participants

*Enhancing access to quality healthcare, particularly primary and preventive care, by improving the supply and distribution of healthcare professionals through community/academic educational partnerships.*

**AHEC Scholars** a longitudinal program designed to prepare future health professionals' leadership skills within a rapidly changing healthcare system. In 2021, AHECs asked Scholars about key learning outcomes including: team-based care, cultural competence, behavioral health integration, and their future practice. Selected results are provided below.

### 91 AHEC Scholars:

- 32 medical students
- 7 pharmacy students
- 17 APN, RN, LPN and CNA nursing students
- 41 behavioral health students
- 1 physician assistant students
- 1 public and community health students

**Pipeline programs** expose students to health careers and develop intent to pursue post-secondary education in primary healthcare professions.

## 7,875

 health career participants

from disadvantaged backgrounds

from rural backgrounds

underrepresented minorities

**Clinical training** improves readiness, willingness, and ability of health professions trainees to serve in primary care, rural, and underserved community settings.

## Facilitated 146

 rotations

### Clinical Training Sites by Location

**Continuing education** providing health professionals with access to resources to improve the quality of care for medically underserved communities and health disparities populations.

## 2,279

 continuing education participants
