Early screening for Autism Spectrum Disorders is necessary in order to provide early intervention services. Therefore, audience participants will be prepared to screen for Autism Spectrum Disorders using the evidence-based M-CHAT-R tool after attending this presentation. Discussion will also entail how to address parents with the results of the M-CHAT-R, making referrals, and following up on referrals and recommendations in order to ensure follow-through and coordination of care.

Target Audience: Health care professionals including physicians, psychologists, physician assistants, nurse practitioners, registered nurses, certified medical assistants, social workers and community health workers.

AGENDA

9:30 a.m. -9:45 a.m.: Registration

9:45 a.m.- 9:50 a.m. Welcome

9:50 a.m.-10:05 a.m.: Screening for Autism Spectrum Disorders

10:05 a.m.-10:25 a.m.: M-CHAT-R review

10:25 a.m.-10:40 a.m.: Break

10:40 a.m.-11:20 a.m.: Administration and scoring of M-CHAT-R

11:20 a.m.-11:35 a.m.: Considerations and concerns

11:35 a.m.-11:45 a.m.: Referrals and Recommendations

ASDMCHATR](https://www.surveymonkey.com/r/ASDMCHATR)

Learning Objectives:

- Review the necessity of screening for Autism Spectrum Disorders
- Overview of the M-CHAT-R will be provided
- Review and practice of the administration and scoring of M-CHAT-R
- Discussion will entail considerations and concerns of administration and scoring
- The process of making referrals and recommendations based on assessment results will be reviewed.
- Coordination of care and follow up recommendations will be discussed

Learning Outcomes:

- Identify signs of Autism and at risk clients
- Identify the importance of early screening
- Implement all components of the M-CHAT-R with guardians of at risk children
- Score the M-CHAT-R to determine proper responses and referrals
- Refer to the “next steps” for evaluation or treatment
- Follow up with clients and providers to determine follow through and results of evaluation
